

Summary

- Passionate **AI Engineer** with over **4 years of experience** in **Computer Science**, possessing strong **technical**, **theoretical**, and **analytical** skills, including **model training**, **algorithm optimization**, and **problem-solving**.
- **Machine Learning Researcher** with expertise in developing **AI models**, having established a **pre-trained GAN** for **limited-labeled brain MRI segmentation**, advancing practical **AI** and **ML applications** and contributing to both **industry** and **research**.
- **Skilled Programmer** proficient in **Python** and other **programming languages**, along with modern **technologies**, with practical experience as an **iOS Developer** for an **international company**, demonstrating strong **technical expertise**, **teamwork**, and effective **communication** in **collaborative settings**.
- **Active Open-Source Contributor**, collaborating on **public** and **volunteer projects**, fostering **knowledge sharing** and providing **tools** for **developer** and **research communities**.

Skills

Programming Languages: Python, Julia, C/C++, Swift, Objective-C

Data Science & Machine Learning: TensorFlow/Keras, PyTorch, Scikit-learn, OpenCV, Pandas, NumPy

Database & Data Management: SQL, PostgreSQL, SQLite, Query optimization

DevOps & Cloud Deployment: Docker, Kubernetes, MLOps, Cloud-based AI Model Deployment

Software Development & Engineering:

- **Methodologies & Project Management:** Agile (Scrum, Kanban), Jira, Confluence, Trello
- **Design & Architecture:** SOLID, Clean Architecture (VIP), MVC, MVVM, Repository Pattern
- **Version Control & Testing:** Git, GitHub, GitLab, Unit Testing, TDD, BDD, CI/CD
- **Development Tools:** LaTeX, Command Line, Linux, Firebase

Publication

Pre-Trained Generative Adversarial Network for Limited-Labeled Brain MRI Segmentation

Authors: Mehdi Karami*, Dr. Betsabeh Tanoori

*Primary author, Manuscript in preparation

Work Experience

iOS Developer

Jun 2023 – Jun 2024

Round Table Apps

Development Office, Tehran, Iran

Contributed to the development of diverse, international-scale applications across various domains, including healthcare, finance, and postal transportation.

- **Resilience Box**
 - Healthcare app focused on mental health management, providing online learning resources, well-being videos, an in-depth podcast series, informational fact sheets, and access to counseling and coaching services.
- **Blossom – Save and Invest**
 - Savings app that helped users in Australia and New Zealand reach their financial goals faster by providing access to high-interest savings products.
- **MailPlus**
 - Postal transportation app designed for postal service drivers across Australia.

Technical Contributions:

- Utilized architectural and design patterns, such as Repository, VIP, MVC, and Clean Architectures, to manage project structure and layers.
- Conducting detailed research on the optimal utilization and development of augmented reality (AR) and virtual reality (VR) technologies, utilizing visionOS and other relevant technologies.
- Performed comprehensive research and analysis of data flow to ascertain the behavioral patterns of applications across various scenarios.
- Applied optimization techniques for real-time data processing.
- Implemented algorithms for financial calculations and optimizations.
- Conducted Behavior-Driven Development (BDD) to ensure robust and high-quality code.
- Created detailed documentation with Xcode DocC and Confluence.
- Collaborated with iOS and other teams including BackEnd, Test, Design, FrontEnd, and Android teams, using Scrum, Jira, and other management tools.

Open Source Projects

▪ Cyberattack Detection and Anomalous Behavior Analysis

- Utilizes a Recurrent Neural Network (RNN), technically Long Short-Term Memory (LSTM), to detect cyberattacks based on anomalous behavior in network traffic. The model identifies abnormal patterns associated with attacks, e.g., DDoS, port scanning, and brute-force attempts.
- Stack: Python, Keras (TensorFlow), Scikit-learn, Principal component analysis (PCA), Receiver Operating Characteristic (ROC) Curve, ...

▪ Solar Power Generation Prediction

- Implements multiple machine learning models, i.e., Linear Regression, Decision Tree Regressor, Gradient Boosting Regressor, Random Forest Regressor, Multi-layer Perceptron (MLP) Regressor, and Deep Neural Network (DNN), to predict solar power generation. Models are evaluated using performance metrics such as Mean Absolute Error (MAE), Mean Squared Error (MSE), Coefficient of Determination (R^2), and Confusion Matrix to ensure accurate predictions.
- Stack: Python, Scikit-learn, TensorFlow, Pandas, Matplotlib, NumPy, Seaborn, ...

▪ AI Sight Quest

- Utilizes AI to extract text from images via Apple's Vision Framework and provides instant answers to document questions using the Bidirectional Encoder Representations from Transformers (BERT) language model.
- Stack: Machine Learning, Deep Learning, Swift, SwiftUI, SwiftData, Model-view-viewmodel (MVVM), Vision Framework, Speech Framework, TipKit, ...

▪ Proximity Finder

- Efficiently detects the nearest point pair on a 2D screen with $O(n \log n)$ complexity using Divide and Conquer. Includes an interactive slider for dynamic point adjustment.
- Stack: Swift, UIKit, Model-View-Controller (MVC), Algorithm Design, Algorithm Optimization, Core Graphics, ...

▪ Heart Pulse Detector - Beats Per Minute (BPM) Counter

- Programs a BPM calculator using an Arduino Uno to monitor heart rate and display pulse data through a real-time heart rate graph.
- Stack: Arduino C/C++, Data Processing, Sensor Integration, Display Handling, ...

▪ Command-line Game

- Designs and implements interactive command-line games, emphasizing scalable architecture, efficient logic processing, and a seamless user experience.
- Stack: Swift, Protocol-Oriented Programming (POP), Clean Architecture, ...

Additional projects can be found at: [GitHub account](#).

Education

Bachelor of Computer Engineering - GPA: 3.57/4.00 (equivalent to 17.88/20)
Zand Institute of Higher Education

Sep 2021 - Aug 2025
Shiraz, Iran

Visiting Student
University of Science and Culture

Feb 2023 - Jul 2024
Tehran, Iran

Teaching Experience

Teaching Assistant (TA)

Zand Institute of Higher Education, Shiraz, Iran

▪ **Fall 2024:**

- Human-Computer Interaction
- Digital Electronics

▪ **Spring 2025:**

- Fundamentals of Computer and Programming
- Digital Electronics
- Computer Architecture

Volunteering

Workshop on Git and GitHub

Zand Institute of Higher Education

Dec 2024

Shiraz, Iran

Workshop on Git and GitHub (Techniques for Effective Collaboration)

Credential ID 400434784

K. N. Toosi University of Technology

May 2024

Tehran, Iran

Contributor of Swift Evolution GitHub Repository

Participated in the proposals of the Swift Evolution repository.

Since Dec 2023

Honors & Awards

Winning First Place in the C++ Programming Language Competition

Hosted by Zand Institute of Higher Education

May 2022

Shiraz, Iran

Certificates

Swift for Beginners

Credential ID 1688271634

Issued by Mind Luster

Mar 2023

Theoretical understanding of Swift 4

Credential ID CT-QD4IETGO

Issued by Sololearn

Jan 2023

Language

English: Fluent

Persian–Turkish: Native

TOEFL

Total Score: 89

▪ Reading: **23**

▪ Listening: **22**

▪ Speaking: **19**

▪ Writing: **25**
